Education

Centro de Enseñanza Técnica Industrial (CETI)

Computer Information Technologist

Jan 2012 - Jan 2016

Technologies

JavaScript React Python Typescript Nodejs Nextjs GraphQL Apollo AWS AWS Lambda Docker Kubernetes Tilt
AWS DynamoDB Temporal vue.js Go Lang Hapi.js Postgres PHP AWS Kinesis AWS SQS AWS Dynamo AWS CloudWatch
SQL Server Rest jenkins Verdaccio React Native GCP cloud run MongoDB Atlas Angular 7 Loopback 3 PostgreSQL Redis
Elasticsearch CI/CD Angular 4 MongoDB Electron iOS Windows Elastic Cordova

Experience

Zillow Group

Senior Software Engineer

Apr 2024 - Present

JavaScript React Python Typescript Nodejs Nextjs GraphQL Apollo AWS AWS Lambda Docker Kubernetes Tilt
AWS DynamoDB

- Lead the development of new systems to improve the purchase and rental experience.
 - Contributed to the development of new features to improve the overall user experience.
 - Developed and maintained BackEnd features and microservices to enhance scalability.
 - Mentored junior developers.
 - Performed code reviews to ensure quality standards.
 - Optimized code to deliver the best performances possible.
 - Analyzed points of opportunity to tackle performance issues.
 - Proficient on development of new features.
 - Architecture contributions to improve the overall systems.
-

X-Team

Senior Software Engineer

Oct 2021 - Apr 2024

Temporal vue.js Go Lang Hapi.js React AWS AWS Lambda Nodejs Postgres Docker Kubernetes

- Developed and maintained FrontEnd and BackEnd features.
 - Performed code reviews to ensure quality standards.
 - Optimized code to deliver the best performances possible.
 - Analyzed points of opportunity to tackle performance issues.
 - Proficient on development of new features.
 - Leading the development of new services.
 - Architecture contributions to improve the overall systems.
-

Encora

Senior Software Engineer

Contract with GOBankingRates

Mar 2020 - Oct 2021

PHP Python React Nextjs AWS Lambda AWS Kinesis AWS SQS AWS Dynamo AWS CloudWatch

- Developed and maintained BackEnd features and microservices to enhance scalability.
 - Mentored junior developers.
 - Architecture contributions on multi-regional delivery and reliability.
 - Refactored internal libraries following clean code principles to improve performance and maintainability.
 - Migrated microservices from a conventional environment to a Serverless one to optimize infrastructure performance.
 - Led the development and integration of an internal microservice that advanced data quality.
 - Modernized a legacy codebase by migrating from PHP to JavaScript which improved functionality and standardization.
 - Performed code reviews that ensured that the software was meeting its specifications and quality standards.
-

The Ksquare Group

Software Engineer

Contract with Boy Scouts of America

Jul 2019 - Mar 2020

Javascript Nodejs Hapi.js SQL Server Rest AWS jenkins Verdaccio

- Developed and maintained the organization's core API REST endpoints to ensure proper integration and functionality.
 - Improved microservice architecture to allow microservices to work together to operate as a monolithic service.
 - Refactored complex SQL queries to improve application performance.
 - Performed code reviews to improve code readability, performance, and maintainability.
 - Analyzed log data to detect anomalies in the API's performance and promptly resolve the issues.
 - Deployed multiple APIs from a Monorepo to optimize version control
-

Freelance

Software Engineer

Dec 2017 - Jul 2019

JavaScript Typescript React React Native Nodejs Docker Kubernetes GCP cloud run MongoDB Atlas Angular 7
Loopback 3 PostgreSQL Redis Elasticsearch AWS CI/CD

- Worked on the entire full development lifecycle of an application to ensure a quality product from start to finish.
-

Lüphole

Software Engineer

Contract with GE Digital

Jan 2015 - Dec 2017

JavaScript Nodejs Loopback 3 Angular 4 Typescript MongoDB Electron iOS Windows Rest AWS Elastic Cordova

- Worked on the entire full development lifecycle of an application to ensure a quality product from start to finish.
 - Built features that enabled the app to communicate with other iterations of the same app.
 - Indexed large quantities of PDFs to enable a function that could search the PDF files.
 - Developed a Desktop and Web User Interface with Angular to promote an intuitive User Experience.
 - Integrated with GE's intranet and authorization services to optimize security.
 - Designed the application to be compatible with Desktop and Web browsers to increase cross-platform usability.
 - Designed the architecture of the backend, desktop and web applications.
-
